

Tank Tough

GFR-S90V
Currency
Discriminator

A Heavy Duty Discriminator with Advanced Counterfeit Detection

Glory's long history of successful currency discriminators now boasts the most powerful high volume discriminator of all: the tank tough GFR-S90V.

Still small enough for any desktop, the GFR-S90V is the perfect solution for heavy duty, non-stop batching, 24-hours a day, year after year. Features include the largest feed hopper to date for a compact. Up to 1,000 notes per minute can be processed in mixed currency with a separate reject stacker for reject notes. The easy-to-read LED screen can provide the total count value, the number of pieces counted, and the individual denomination amounts. Counterfeit detection is doubled with both dual magnetic sensors and new quick start ultra-violet technology.

The GFR-S90V is engineered throughout with rugged, reliable components and a currency processing capability that only Glory's experience can provide.
